Welcome to FOCUSed Workshop
Notifications and Accretions

• All phone lines have been placed on mute
• Ask questions directly to Subject Matter Experts using the Q&A Panel
• Additional resources will be provided at the end of today’s session

• Dial In: 1-866-906-7447   CODE: 8084929#

Start Time: 2:00 PM ET/11:00 AM PT
CROWNWeb Outreach, Communications, and Training Team

Matthew McDonough, MS, CTT
Project Manager

Oniel Delva, BA, CTT

Mike Seckman, CTT
Senior Trainer

Michelle Barry, BFA
Technical Writer
**WebEx Q&A Feature**

**USING THE WebEx Q&A FEATURE**

All lines are placed on mute to block out background noises. To speak, you can send a question to the panelists via the “Q&A” button.

Follow the directions below to use the “Q&A” button:

1. Mouse over to the **WebEx Navigation Panel** located at the top of your screen.

2. Click the **Q&A** icon. The Q&A box displays.

3. Click the **drop-down arrow** next to “Ask:” and select **All Panelists**. Type your question, and click the **Send** button. A Panelist will send you a response.
Before You Begin...

Before you can resolve a notification or accretion, the following conditions must be met:

- You must be a **Facility Editor** to:
  - View notifications and accretions at your facility.
  - Take action (accept, reject, escalate, or mark as under investigation) on any notification or accretion.
What are Notifications and Accretions?

**Notification**

A difference in patient data (identification or treatment) between what the REMIS (REnal Management Information System) database has received from another CMS database and what exists in CROWNWeb.

**Accretion**

A patient that the REMIS database has identified as a potential ESRD patient associated with your facility, but that is not currently admitted to your facility in CROWNWeb.
What are Notifications and Accretions?

CROWNWeb provides a way for facilities to resolve these discrepancies using the **Action List** tab.

REMIS gathers information from various CMS databases and compares that data to CROWNWeb.

CROWNWeb receives discrepancy information each night, and assigns notifications and accretions to facilities based on that information.
How Do I Fix Them?

Resolving Notifications and Accretions

• All non-Batch Submitting Organization facilities must maintain their own data in CROWNWeb (Batch Submitting Organizations must make any required changes to patient records in their internal corporate systems. At the next information “batch” upload, CROWNWeb will be updated.)

• Networks are available to assist facilities with notifications and/or accretions that require assistance.
There are two types of notifications you can resolve in CROWNWeb:

- **REMIS Identity Notification:**
  Contains differences in a patient’s identifying information (first name, last name, Social Security Number, Medicare Claim Number, date of birth, or gender). Accepting this type of notification automatically changes the data in CROWNWeb.

- **REMIS Event Notification:**
  Contains differences in a patient’s modality or death status. When you accept this type of notification, you must manually update the data in CROWNWeb.
Notification Action Selections

After reviewing or resolving the discrepancy, you will assign an Action to the notification.
Notification Action Selections

After reviewing or resolving the discrepancy, you will assign an **Action** to the notification.

You agree with the external source. Accepting a notification means you allow CROWNWeb to change your data (Identity), or you will change it yourself (Event).
Notification Action Selections

After reviewing or resolving the discrepancy, you will assign an **Action** to the notification.

After research, you do not agree with the notification. No changes will be made to your CROWNWeb data.
Notification Action Selections

After reviewing or resolving the discrepancy, you will assign an **Action** to the notification.

Let other users know that you are investigating this notification.
After reviewing or resolving the discrepancy, you will assign an Action to the notification.

If you cannot resolve the notification on your own, this option sends the notification to the Network for help.
Event Notification
Welcome to CROWNWeb!

Below is a listing of the CROWNWeb features in this release. The production environment contains startup data copied from SIMS, the ESRD Patient Registry maintained by the ESRD Networks.

- Users will be able to search, add, save, edit, submit, and print facility records.
- Users will be able to search, add, edit, submit, and print facility personnel records.
- Users will be able to admit to and discharge patients from a facility.
- Users will be able to add, edit, and submit patient treatment records.
- Users will be able to search, edit, and submit a patient record.
- Users will be able to enter information associated with the 2728 form for Initial, Supplemental, and Re-entitlement patients (including Initial Dialysis, Initial Transplant, Supplemental Training, Supplemental Transplant, and Re-entitlement forms).
- Users will be able to enter a 2746 form for a patient.
- Users will be able to print blank 2728 and 2746 forms, along with pre-populated 2728 and 2746 forms for patients.
- Users will be able to verify patients and patient data using the PART feature.
- Users will be able to search, add, edit, and submit clinical lab test results and vascular access information for patients.
- Users will be able to add, edit, and submit facility preferences for clinical data.
- Users will be able to create and print a patient roster for a facility.
- Users will be able to run Audit reports for all data added, updated, or deleted in CROWNWeb.

Internet Explorer 7 users should verify the following setting before using CROWNWeb. Close all Internet Explorer windows and open a new Internet Explorer browser window. Then go to Tools -> Internet Options, select the Advanced tab, scroll to the Security section and ensure the "Enable Native XMLHTTP support" option is NOT selected. If the option is selected, apply this change, then return to the application.

Accretion
ACCRETION TYPES

You will only encounter one type of accretion to resolve in CROWNWeb:

• **REMIS Accretion**: Contains a patient in REMIS has identified as a potential ESRD patient associated with your facility, but has not admitted to your facility in CROWNWeb. Accepting an accretion will require you to admit the patient in CROWNWeb.
Accretion Action Selections

After reviewing or resolving the discrepancy, you will assign an **Action** to the accretion.
Accretion Action Selections

After reviewing or resolving the discrepancy, you will assign an Action to the accretion.

You agree with the external source and will admit the patient to your facility.
Accretion Action Selections

After reviewing or resolving the discrepancy, you will assign an **Action** to the accretion.

You don't agree with the accretion because research shows that the patient is **not** ESRD.
Accretion Action Selections

After reviewing or resolving the discrepancy, you will assign an Action to the accretion.

Lets other users know that you are investigating this accretion.
Accretion Action Selections

After reviewing or resolving the discrepancy, you will assign an Action to the accretion.

The patient is not part of your facility. The Network will need to reassign the accretion.
